

VTrans Prequalified Fabricator (or coatings facility) Application Worksheet

General Fabricator (or coatings facility) Information

- a) Name and Title of person filling out Application: _____
- b) Name and Location of Fabricator: _____
- c) Number of years in business: _____
- d) Types of products produced for DOTs (check all that apply), and approximate years of experience in each category:
 - a. Vehicular Steel Bridge superstructures: _____ years
 - b. Pedestrian Steel Bridge superstructures: _____ years
 - c. Steel bridge components (bridge rail, bearings, expansion joints, etc.): _____ years
 - d. Overhead Sign structures: _____ years
 - e. Painting of steel bridge/sign structures/components: _____ years
 - f. Metalizing of steel bridge structures/components: _____ years
 - g. Powder Coating of steel bridge/sign structures/components: _____ years
 - h. Galvanizing steel bridge/sign structures/components: _____ years
- e) Current AISC Certification and Endorsements:

- f) Other applicable certifications for the plant:

Section 1 is for fabrication. Section 2 is for Coatings. If a steel fabricator also has coatings division, or sub-contracted coatings division on site, both sections shall be completed.

SECTION 1: Steel Fabrication (responses in this section are for Fabrication personnel only, not Coatings personnel)

1) Personnel

- a) President: _____
- b) Plant Manager: _____
- c) Quality Control Manager: _____
 - a. Years employed in position: _____

- b. Is drafting/detailing contracted out? If so, list commonly used detailers (company and location)

- c. Is any material processing typically performed by subcontractors? If yes, please list and explain:

- d. What project/owner specific documentation are subcontractors provided prior to performing work for each project?

SECTION 2: Coatings Application

1) General Information and Affiliation with Steel fabrication plants

- a) What is the affiliation between this coating facility and the steel fabricator?
 - I. "Coatings" is a division of the steel fabrication company at the same plant
 - II. Coatings are performed by a subcontractor of the steel fabrication company, at the same plant where the fabrication is performed.
 - III. Coatings Company is a subcontractor for various steel fabrication companies and is owned/operated at an independent facility off site from fabrication.

- b) What type(s) of coating(s) is this application for? (check all that apply)
 - I. Galvanizing
 - II. Metalizing
 - III. Painting
 - IV. Powder Coating

2) Personnel (Note: if this application being completed based on option II in part a (coating is performed by a subcontractor of the steel fabrication company, at the same plant where the fabrication is performed), for each position below, please state if it is filled by a fabricator employee or a subcontractor employee.

a) President: _____

b) Plant Manager: _____

c) Quality Control Manager: _____

a. Years employed in position: _____

b. Years of experience in similar position: _____

c. Years of experience of Metalizing Inspection: _____

d. NACE/BCI/PCI Certification type/level: _____

d) Head of Inspection (if different than QC Manager): _____

a. Years employed in position: _____

b. Years of experience in similar position: _____

c. Years of experience of Metalizing Inspection: _____

d. NACE/BCI/PCI Certification type/level: _____

e) Total number of NACE/BCI/PCI inspectors employed: _____

a. Number of NACE/BCI/PCI Inspectors with greater than 1 year of experience with inspecting Metalizing: _____

f) Average experience of NACE/BCI/PCI inspectors performing coatings inspections (years by type of coating):

g) Number of coating applicators employed (for each type of coating):

a. Average experience of the coatings applicators (for each type of coating) (years):

h) Who is responsible for notifying owners to coordinate for QA inspection and when does this occur?
